Introducing...

# Fast-Fit

The Fastec 'Fast-Fit' system has been developed to help installers by aligning and securing the fitting into the tube until the glue cures. With just a simple push and twist the Fast-Fit rubber sleeve slides into the tube firmly holding and aligning the fitting. This allows installers to move onto the next joint safe in the knowledge that the fitting will be held correctly in position without vibrating loose or misaligning.

**The Perfect Fit**

## CENTRALISES AND ALIGNS

Once inserted the unique rubber sleeve compresses equally around the circumference compensating for any movement between the fittings and tube. This equal compression centralises the fitting with the tube ensuring a consistent alignment between the two parts.

## SECURES AND STABILISES

To help enable a secure and seamless fit for your joints Fast-Fit will securely hold the fitting in place whilst the glue is curing preventing gaps from forming through movement and vibration. By tightly securing the fitting to the tube allows the installer to move onto the next joint without the need for extra remedial works to hold the fitting and tube together whilst the glue cures.

## SAVING TIME AND MONEY

The simple solution that the Fast-Fit system offers is based on the key principles of saving time and money for the installer. To help with this cost reduction the Fast-Fit range will be charged at no extra cost allowing installers all the benefits of the Fast-Fit system at the same competitive price.

## QUICKER INSTALLATION TIMES

Having the benefit of aligning and securing each joint Fast-Fit allows installation times to be reduced by upto 20%. The Fast-Fit unique innovation means installers do not need to taking extra remedial work to secure the joints or wait until the glue cures before proceeding but can quickly progress from one joint to the next.

## AVAILABLE FOR ALL GLUED INSERTS

The Fast-Fit system is available on all glued inserts for 48.3mm and 42.4mm diameter connectors, this means that the whole range has been incorporated giving the installer the benefit of the Fast-Fit system on all glued inserts.

# about us

---

**Fastec Handrail Systems specialises in the supply and delivery of off-the-shelf stainless steel modular handrail fittings.**

We have designed and manufactured our Fastec modular handrail fittings to fulfil all your requirements.

Fastec Handrail Systems forms part of the Barrett Steel Ltd group. We operate from a purpose-designed 3100ft<sup>2</sup> warehouse and sales facility and hold extensive stocks within the UK, ensuring rapid next-day turnaround to service and meet all your requirements.

Our friendly sales advisors are here to help, offering sales assistance and technical support to ensure you receive the best levels of service and aftercare.

Fastec has established a reputation for outstanding customer service, total reliability, fast delivery and above all, premium quality products.

All our products are available off the shelf, ready for next-day delivery wherever you are in the UK. We will help you stay within your project's budget without compromising on quality, service or the aesthetic appearance of your completed installation.

And for your complete peace of mind, our products have been independently tested for safety.

# philosophy

---

## Creativity. Innovation. Technical Mastery

These are Fastec Handrail Systems watchwords. We are a progressive business, working in long-term partnerships with our customers to realise your project's full aesthetic and functional potential.

You can be sure we understand your business and the environment in which you operate. Our customers choose us because they know they can rely on our innovative approach and complete commitment to the success of a project.

We'll work closely with you to ensure your budgets and timescales are met sharing our judgement, expertise and problem solving skills to guarantee the best outcome for your project and your business.

We focus on your requirements because the end result is as important to us as it is to you. That's why we add value every step of the way whilst keeping you on schedule and within budget. We're more than happy to have a no-obligation discussion with you about your current and future plans.

Call us today – we are waiting to hear from you.

# achieving a **superior** corrosion resistance with G316's'

---

**Although stainless steel has an inherent corrosion resistance it cannot be called 'stain free'. In certain conditions it will stain and discolour.**

To offer our customers a superior product and greater value for money, all G316 Fastec handrail fittings are manufactured using increased levels of 'Chromium', 'Molybdenum' & 'Nickel' which are above the maximum percentage stated for G316.

We have called this superior grade G316's ('s' means superior). This higher grade offers substantially more corrosion resistance than standard G316, providing greater peace of mind, lower maintenance and less cleaning.

## proven superiority

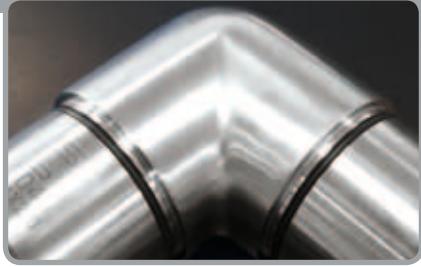

---

**Sheffield Testing Laboratories Ltd have carried out stringent tests to compare the performance of G316 and G316's' under rigorous salt spray testing. The G316's' fitting outperformed the standard grade G316 fitting, showing no sign of staining over the same test period.**

In addition to its unrivalled aesthetic appeal, Fastec G316's' products offer unmatched durability, long life and low maintenance, providing a robust, extra corrosion-resistant solution for a wide range of applications. Your installation will maintain its 'as new' appearance with minimal attention.

**Our G316's' fittings offer superior corrosion resistance.**

## the fastec handrail system

**Stainless steel is the architect's material of choice for a wide range of high-profile developments, from luxury residential apartments to shopping malls, nightclubs, shops, bars and restaurants.**

Functionally practical and aesthetically pleasing, stainless steel handrailing, coupled with complementary glass and cable systems, is a hallmark of today's contemporary and minimalist designs. With its emphasis on simplicity, elegance and – crucially - low-maintenance, the Fastec range can accommodate all your requirements.

The benefits of the Fastec Handrail System are its versatility, modular nature and comprehensive range. In addition the whole system is designed with ease of manufacture, assembly and installation in mind.

Fastec lives up to its name: it can be fitted quickly and cleanly and above all no reworking is necessary.

## quality

**We aim to provide the best quality products within the market place. To ensure this, all the fittings within the Fastec range are manufactured and inspected to meet your high standards.**

Fastec Handrail Systems has gained BS EN ISO9001: 2008 accreditation ensuring you benefit from exceptional product quality and service levels.

This accreditation guarantees that we conform to stringent quality control procedures. Ensuring we get it right first time, every time – so you will too.

RS24788

# customer care

---

## Our focus is your business.

Fastec is a customer-focused company. We take a meticulous approach to serving our customers, from initial enquiry through to delivery and after-sales services.

Providing the products and services our customers require is the key to our success. That's why we are proactive in anticipating the evolving needs of our customers.

Our highly experienced and knowledgeable technical experts will quickly understand the nature of your project and your precise requirements.

We are happy to deal with all your questions and enquiries and our experts will be able to guide you through our extensive range of products and the ordering process – whether you're working on a small domestic project or a substantial commercial or architectural development.

Above all, it is the level of personal service we provide, backed by our experience, knowledge and expertise, that ensures we always meet and frequently exceed our customers' expectations.

# delivery

---

**Once your order is placed, it will be promptly prepared for dispatch with the greatest care and attention to detail as part of our extensive quality control procedures.**

We use only proven and reputable carriers so you can be confident that your order will arrive on time and in perfect condition ready for installation.

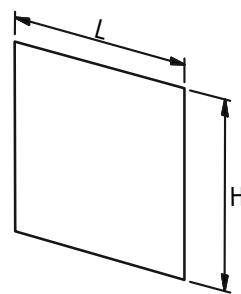

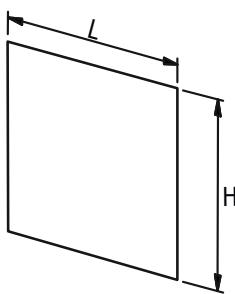

Orders received before 2.00pm will qualify for next-day delivery, and we can also arrange, on request, deliveries for specific time-slots such as before 10.30am, before noon, and Saturday morning.

A close-up photograph of a polished stainless steel handrail and support post in a modern interior setting. The handrail curves elegantly, reflecting the surrounding environment. The background is softly blurred, showing a staircase and some wall art, which emphasizes the sharp, reflective surface of the metal.

The complete solution

## FREE FIXINGS

**We listened to your needs and have responded by providing all the fixings you need to assemble your Fastec Handrail System.**

All the bolts and screws for each fitting will be supplied with your order to allow you to concentrate on assembling and building your system together saving you both time and money.

Please refer to the individual fittings for information and details on the bolts and screws supplied.

Whilst we supply the bolts and screws for fastening the system together we do not supply the fasteners to secure the fittings to floors and walls, if you are unsure which fittings are supplied please refer to the information stated on each fitting.

Look out for the  
**FREE FIXINGS**  
offer. Please call  
for further details.

Introducing...

## Glass-tec PRODUCT BROCHURE

Fastec Handrail Systems Ltd are delighted to launch our new revolutionary Glass-tec product brochure which showcases our new range of structural glass base profiles and accessories. With 14 different choices of base fixing systems available we have brought together a complete solution for all your project requirements all of which are stylish, safe and easy to assemble.

## Glass-tec PRODUCT BROCHURE

Innovative Handrail Solutions

driven by quality

#### Fahrertraining

To request a copy of the new brochure  
contact your local sales team

**NEED  
GLASS?**  
Let Us Quote

# Flex-Fit

Introducing 'Flex-fit' which is the new revolutionary glass fixing system. Flex-fit allows perfect alignment of glass with just a simple sliding movement you can position the glass with precision allowing for up to 40mm movement helping to reduce installation times by up to 30%..

Adjust the way you work

**SAFETY TESTING**

# safety first

---

## Has your balustrade been tested to **BS 6180 'Barriers in and about buildings'**?

Fastec has established the needs of our customers and has recognised that most handrail systems on the market today have not been tested to ensure they meet British Standard side loading criteria.

## the fastec response

---

For your absolute peace of mind, and to create confidence in your installation for you and your customer we have commissioned extensive testing by independent engineers to establish exactly which design, tube size and thickness, upright centres and fittings will be safest for your installation.

The test results show actual 'as installed' results. Please see the following tables for guidance

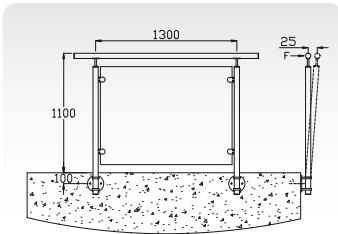

Full test report and  
Test Certificates available  
to download from  
[www.fastechandrails.co.uk](http://www.fastechandrails.co.uk)

# test results

## System 1 - Side Mounted Balustrade Testing in accordance with BS 6180

### SYSTEM 1 – 42.4mm DIAMETER TUBE

		Fastec Code
S/S Baluster Tube Diameter (mm)	42.4x2.6	341900.426.S
S/S Hand Rail Diameter (mm)	42.4x2.0	341900.422.S
Handrail Height (mm)	1100	
Baluster Post Spacing (mm)	1300	
Mounting Type	Side Bracket	341010.420.S
No. of Fixing Bolts Per Post	2	M12
Handrail Connection	Stem	34.0110.426.S
Infill Type	Glass Panel	10mm
Glass Clamps	4 Per Panel	34.3210.420.S

DEFLECTION BEYOND ALLOWABLE LIMIT OCCURRED AT A LOAD OF 19KN/m

BS 6180: Table 2

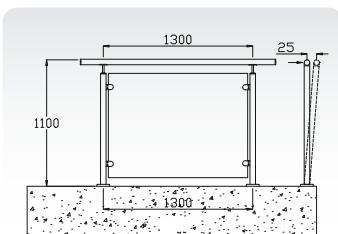

LOAD (KN/m)	CATEGORY	PASSED
0.22	B&E (iii)	✓
0.36	A (i), B&E (iv)	✓
0.74	A (ii), B&E (v), C3 (viii), (ix)	✓

## CARE AND MAINTENANCE

# care and maintenance

To gain the maximum benefits from the Fastec range, the correct care and maintenance procedures should be followed during and after installation.

To achieve maximum corrosion resistance and appearance, the surface of the stainless steel must be kept clean; this is extremely important when used in an external environment.

It is necessary to clean your installation immediately after fitting is complete using Fastec Stain Remover. Following this, periodical cleaning with Fastec Stainless Steel Cleaner will help form a protective barrier against the atmosphere.

Installations in an external environment will require a cleaning schedule to be followed, this is a periodic cleaning off approximately every 3-6/6-12 months thereafter.

For installations in **aggressive environments**, for example coastal regions and swimming pools, you will need to take particular care with cleaning and maintenance to inhibit corrosion. The cleaning schedules relating to these types of areas are much more frequent than standard external installations. In addition, we strongly recommend that only mirror polished items are installed in such environments due to their higher corrosion resistant finish.

## cleaning methods

To assist with care and maintenance we provide **Fastec Stainless Steel Cleaner** and **Fastec Stain Remover**.

**Fastec Stainless Steel Cleaner** is a general purpose stainless steel cleansing spray. It can be used in conjunction with Fastec Stain Remover or as a cleaning product in its own right to clean and shine stainless steel.

**Fastec Stain Remover** is an acid based cleaner which temporarily strips the stainless steel of its passive layer so any contaminants can be removed. It should then be washed off with water which neutralises the acid and causes the passive layer to regenerate on the surface of the stainless steel. This surface should be periodically protected with Fastec Stainless Steel Cleaner.

### ▷ Hints and tips

Always clean your installation once it has been completed. This is necessary to remove any contaminants on the surface of the material to prevent future problems and leaves a finished look behind for your customer.

For outstanding results, use Fastec Stainless Steel Cleaner for internal installations and Fastec Stain Remover followed by Fastec Stainless Steel Cleaner for external applications.

Always use a lint-free cloth, never use an abrasive cleaner or cloth.

It is important to remember that masonry and brick cleaners contain acid, so protect any stainless steel surfaces during their use. Any splashes should be washed off straight away with water.

► Further information on cleaning schedules and maintenance can be found on our website.

# information

## Delivery

Fastec dispatch all orders via carrier on a next day service.

Orders must be received before 2.00pm to be dispatched same day.

Upgraded timed delivery services are available (ie. before noon, before 10.30am, Saturday am) at an additional cost.

Off-shore and some Scottish Highlands locations are only available on a 2-3 day service.

## Price / Payment

All prices quoted are net, VAT will be added.

Delivery charges are in addition to the fitting prices and will be stated at time of quoting/ordering.

Accounts not settled within the agreed time period will be placed on stop and no further goods will be dispatched until the overdue monies are settled.

## Returns

Goods will only be accepted if they are received in a resaleable condition and in their original packaging.

Notification of a return must be made in writing in the first instance and must be received within 1 month after receipt.

A handling fee will be charged, the amount will be confirmed after a notification has been received.

Collection of the items for return can be arranged by Fastec via our carrier but will incur an additional charge. Please state if you require a collection arranging at time of notification. A cost will then be confirmed.

## Claims

Notice of any claim relating to shortages or damaged goods shall be made to the company in writing within 48 hours of receipt of goods. In the event of loss or non-delivery of the goods the customer shall notify the company in writing within 3 days of receiving the advice note.

All goods received damaged on delivery must be signed for as 'Damaged', claims for goods received as damaged but signed for as 'Received in good condition' will not be accepted.

Quantities must be checked on delivery before signing as accepted.

## Terms & Conditions

We reserve the right to change any products within this brochure relating to the design and measurements without prior warning.

Products may be updated or revised and actual products may be slightly different to the items illustrated.

Different shapes and product types may have slightly different polishing matches due to the techniques and processes used.

We cannot be held responsible for printing errors.

The company shall not be responsible for any expenditure losses. Any compensation is limited to the value of the goods.

► Our full terms & conditions are available on request.
